The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10, 12-15 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Capodieci (5,871,793) for reasons of record.

Applicant argues that Capodieci discloses combining the grains with the inclusions without the use of a binder. This has been considered but is not agreed with. At column 4, lines 35-48, binder coating is disclosed to be added to the prepuffed cereal grains. The binder acts to coat the cereal grains. Applicant argues that the inclusions are added into the product rather than onto it. This has been considered but is not persuasive because the inclusions are added onto the pre puffed or puffed cereal grains. The fact that the grains are molded into a cake does not alter the way the inclusions are adhered to the grain. Applicant argues that example 3 and 4 shows that the binder is added after the mixing of the cereal with the inclusions. This has been considered but is not persuasive. No criticality is seen in the particular combination order that is set forth in the claim 1. Example 3 provides for combining cereal with blueberries with

mixing, adding water and then mixing the combination. It is the examiners position that the adding and mixing disclosed at lines 11-12 in example 3 would include steps a and b of claim 1. Applicants' arguments relating to the composition of the binder have been considered but are not persuasive. The binder is disclosed to contain water at column 4, line 49. The binder ingredients, especially starch (column 4, line 47) is known in the art to be an adhesive agent and a film former.

The rejection of the claims under 35 USC 102 has been withdrawn in response to applicant arguments.

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory

period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
